

JORGE TRUJILLO

Bogotá, Colombia | jorge.trujillo@email.com | [linkedin.com/in/jorgetrujillo](https://www.linkedin.com/in/jorgetrujillo) | github.com/jorgetrujillo

Executive Summary

Strategic Solutions Architect, Senior Technical Lead, and AI/Fintech Engineer with over 9 years of hands-on expertise architecting high-availability software ecosystems, payment infrastructure, and production-grade LLM applications. Having progressed through foundational SDLC roles at SunDevs (QA Engineer, Project Manager, Technical Account Manager, IT PM, and Backend Developer) to Senior Backend Developer & AI Solutions Engineer at LeapFinancial, Jorge brings an extraordinary blend of executive product vision and deep backend implementation.

Core Competencies

- **Architecture & Engineering:** Solution Architecture, System Design, Microservices, Event-Driven Systems, API Gateway Design, Scalability
- **AI & Agent Infrastructure:** Agentic Workflows, OpenAI/Gemini/OpenRouter Architectures, Function Calling/Tool Systems, Prompt Optimization
- **Fintech & Payments:** Open Banking, Card Onboarding (Visa, Mastercard, CRB), Sensitive Tokenization (VGS Proxy), AVS/ANI Verification
- **Technical Leadership:** Engineering Management, Technical Account Management, SDLC Optimization, Cross-Functional Alignment

Technical Skills Summary

Programming Languages:	Node.js, Python, TypeScript, JavaScript
AI Systems:	LLM Integration, Agent Workflows, Multi-Step Tool Calling, Prompt Systems, OpenAI API, Gemini, OpenRouter
Fintech Networks:	Visa, Mastercard, Cross River Bank, VGS Proxy, Open Banking Standards, PCI-Sensitive Workflows
Cloud & Infrastructure:	Google Cloud Run, Railway, Docker, Redis, Doppler, GitHub Actions, CI/CD Automation
Methodologies:	Agile, Scrum, Technical Discovery, Business Analysis, QA Orchestration, Solution Scoping

Detailed Professional Experience

LEAPFINANCIAL	Miami, FL, USA (Remote) May 2023 – Present
---------------	--

Senior Backend Developer & AI Solutions Engineer

- **Fintech Architecture & Payment Security:** Architected and deployed production backend services integrating Very Good Security (VGS) Proxy, Visa, Mastercard, and Cross River Bank (CRB) to execute automated card onboarding, identity matching, and capability validation.
- **Payment Security Compliance:** Engineered security mechanisms for processing PCI-sensitive payment payloads, incorporating Address Verification System (AVS) and Account Name Inquiry (ANI) algorithms.
- **Production AI Systems:** Designed and deployed 6 customer-facing, multi-step production AI agents powered by OpenAI, Gemini, and OpenRouter architectures:
 - *International Remittance Assistant:* Automated multi-currency cross-border money transfers, identity verification flows, and transactional customer guidance.
 - *Open Banking Assistant:* Enabled real-time bank account management, ledger data extraction, and automated conversational customer support.
- **Core Backend & DevOps:** Engineered high-speed Node.js/Python microservices utilizing Redis caching layer and secured configuration workflows using Doppler and GitHub Actions CI/CD deployed to Google Cloud Run and Railway.

SUNDEVS	Bogotá, Colombia Feb 2017 – May 2023 (6 yrs 4 mos)
---------	--

Progressive Roles: Backend Developer / IT Project Manager / TAM / PM / QA Engineer

- **Junior Backend Developer (Jun 2022 – May 2023):** Transitioned into core backend development, constructing secure REST APIs, payment gateway connectors, and microservices in Node.js and Python.
- **IT Project Manager & Technical Account Manager (Apr 2020 – Jul 2022):** Served as Solutions Architect & Technical Lead for the Cinemark LATAM account across 6 countries (Colombia, Peru, Bolivia, Paraguay, Ecuador, Central America). Analyzed and reverse-engineered the Vista Cinema Backend Engine to standardize ticket pricing and multi-tenant rules across Mobile Apps, Web, and Self-Service Kiosks.
- **Project Manager (Aug 2018 – Mar 2020):** Led engineering teams of up to 7 developers. Managed technical roadmap planning, stakeholder communication, sprint execution, SLA compliance, and software delivery.
- **QA Engineer (Feb 2017 – Aug 2018):** Designed automated and manual test plans for enterprise platforms, ensuring system resilience and deep bug tracking prior to production releases.

CLÍNICA SHARON Y UCI TOLIMA LTDA	Ibagué, Colombia Apr 2015 – Jan 2017 (1 yr 10 mos)
----------------------------------	--

Técnico de Mantenimiento / IT Systems Technician

- Maintained IT infrastructure, server connectivity, hardware diagnostics, and preventive maintenance for critical healthcare operational systems.

Education & Credentials

- **Bachelor of Science in Systems Engineering** – Universidad del Tolima
- **Associate Degree in Information Technology** – Coreducación
- **Languages:** Spanish (Native), English (B2 Professional Working Proficiency)

Executive Portfolio Suite & Complementary Materials

1. Google XYZ Achievement Bullets

- **Accomplished** a secure, high-concurrency card onboarding and validation engine **as measured by** full PCI-DSS compliance and zero-latency authorization failures, **by doing Z:** architecting end-to-end backend integrations across VGS Proxy, Visa, Mastercard, and Cross River Bank with AVS, ANI, and card capability protocols.
- **Accomplished** automated international cross-border transactions across conversational channels **as measured by** deployment of 6 production-grade AI agents processing multi-step remittance workflows, **by doing Z:** engineering custom LLM agent pipelines using OpenAI, Gemini, and OpenRouter with autonomous tool-calling architectures.
- **Accomplished** regional digital ecosystem alignment for Cinemark LATAM across 6 international markets **as measured by** unifying mobile, web, and kiosk channels into a single API pipeline, **by doing Z:** leading technical analysis, API orchestration, and backend integration of the core Vista cinema engine at SunDevs.
- **Accomplished** seamless Open Banking customer capabilities **as measured by** real-time account data retrieval and financial guidance automation, **by doing Z:** designing secure Open Banking APIs integrated into conversational LLM interfaces with strict authentication/authorization boundaries.
- **Accomplished** accelerated engineering delivery velocity and reduced CI/CD deployment overhead **as measured by** zero-downtime releases and streamlined secret management, **by doing Z:** implementing automated GitHub Actions workflows, Doppler configuration systems, and Google Cloud Run deployments.
- **Accomplished** cross-functional execution alignment across engineering, product, and client teams **as measured by** on-time delivery of 100% of project milestones across a 7-engineer pod at SunDevs, **by doing Z:** combining technical account management, agile sprint leadership, and strict QA orchestration.

2. LinkedIn Profile Rewrite

Headline: Solutions Architect | Staff AI & Fintech Engineer | Ex-Tech Lead | Node.js, Python, Open Banking, Agentic AI, Payment Infrastructure

About Summary:

I build scalable backend systems, AI agents, and financial infrastructure that convert complex business objectives into high-throughput production software.

With a 9+ year journey spanning QA, IT Project Management, Technical Account Management, Solutions Architecture, and Senior Backend Engineering across SunDevs and LeapFinancial, I offer a unique perspective: I bridge high-level product strategy with deep, hands-on technical execution.

Currently, as Senior Backend Developer & AI Solutions Engineer at LeapFinancial, I architect modern fintech engines—including card validation platforms (integrating VGS, Visa, Mastercard, and Cross River Bank) and PCI-compliant Open Banking integrations. I have also designed and shipped 6 production AI assistants (powered by OpenAI, Gemini, and OpenRouter) that handle autonomous conversational workflows like international remittances.

Prior to this, during my 6+ years at SunDevs, I served as Solutions Architect & Technical Lead for Cinemark LATAM, leading the integration strategy across 6 countries for mobile apps, web channels, and self-service kiosks, while growing from QA Engineer to IT PM and Backend Engineer.

3. Professional Bio (150 Words)

Jorge Trujillo is a Solutions Architect and Senior AI/Fintech Engineer with over nine years of experience building backend ecosystems, financial platforms, and production AI applications. Over a 6-year tenure at SunDevs, he advanced through QA Lead, Project Manager, Technical Account Manager, IT PM, and Backend Developer roles before joining LeapFinancial as Senior Backend Developer & AI Solutions Engineer.

At LeapFinancial, he architects payment engines—integrating Visa, Mastercard, Cross River Bank, and VGS Proxy—and has deployed 6 production AI agents handling international remittances and Open Banking workflows using OpenAI and Gemini. Previously, he led the multi-region technical architecture for Cinemark LATAM across 6 countries. Jorge holds a B.S. in Systems Engineering from Universidad del Tolima and excels at driving innovation in AI, fintech, and platform architecture.

4. Cover Letter Template

Dear Hiring Team,

I am writing to express my interest in senior technical leadership, backend engineering, or AI architecture roles at your organization. With over nine years of experience across the entire software development lifecycle—spanning QA, IT Project Management, Solutions Architecture, and Senior Backend Engineering—I specialize in building secure, scalable fintech infrastructure and production-grade LLM applications.

In my current role at LeapFinancial, I lead the backend and AI implementation of critical financial systems. I recently architected our card onboarding and validation infrastructure by integrating VGS Proxy, Visa, Mastercard, and Cross River Bank, ensuring strict adherence to PCI requirements while executing real-time AVS and ANI identity checks. Additionally, I designed and deployed six production AI assistants using OpenAI, Gemini, and OpenRouter with multi-step tool-calling capabilities that automate complex international remittance and Open Banking processes.

During my six-year tenure at SunDevs, I served as Technical Lead and Solutions Architect for Cinemark LATAM, directing technical discovery and API integration strategies across six Latin American markets to unify mobile apps, web platforms, and kiosks into a single backend engine. My progression through project management and engineering leadership allows me to seamlessly translate complex executive mandates into reliable engineering roadmaps.

I am excited about the prospect of bringing my combination of fintech experience, AI system architecture, and product leadership to your team. Thank you for your time and consideration.

Sincerely,

Jorge Trujillo
